## THE COMPANY

**OCEANING – Consulting Engineers**, is an office of studies and projects of Coastal and Port Engineering, with main focus on undertaking projects in the sea, the coastal zone, estuaries and ports.

Founded in 2018, **OCEANING** brings together the different experiences of its partners in the fields of Maritime, Coastal and Port Engineering, that equals a total of more than 100 years in engineering activities.

## OUR TEAM

**OCEANING** has a team of expert engineers, with training in hydraulics related to the coastal zone, the estuaries and ports, qualified to coordinate and implement projects.

**OCEANING** maintains a network of professional contacts with other consultants, allowing for its integration into multidisciplinary teams, adapting them to each project.

## OUR SERVICES

We conduct consultations, studies and project planning, related to the construction, expansion and rehabilitation of maritime, coastal and port works, namely regarding:

- Ports and port terminals ;
- Marinas and recreational ports;
- Access channels and manoeuvring basins;
- Dredging and port landfills;
- Breakwaters and quay walls;
- Coastal protection works;
- Sea outfalls and intakes;
- Works in rivers, estuaries and lagoons.
